DETAILED ACTION

Summary

1. Receipt of IDS filed on 03/29/05 is acknowledged.

Restriction/Election

Applicant's election without traverse of group I claims 1-10 in the reply filed on 04/09/09 is acknowledged.

Applicant's election of R1, R2 and R3 are methyl; Y is an hydroxyl group; and X is a substituted alkyl chain, X being a hydroxyl substituted alkyl chain in formula I is acknowledged.

Applicant's election with traverse of specific species 3,3-dimethyl-1,2-butandiol in the reply filed on 04/09/09 is also acknowledged. The traversal is on the ground(s) that there will not be burden for search since the substituents are few are not found persuasive because applicants have not provided evidence to prove that each and every species is obvious variant.

The requirement is still deemed proper and is therefore made FINAL.

Claims 4 and 11-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 04/09/09. It is to be noted that claim 4 does not read on the elected species and since applicants have not provided evidence that species are obvious variants the species

Art Unit: 1612

requirement is deemed proper and final. Further due to search burden and lack of evidence to prove that all the species are obvious variants, the restriction requirement and species requirement is deemed final.

Claims **1-3 and 5-10** are under prosecution on the merits and to the extent they read on the elected species.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35
 U.S.C. 102 that form the basis for the rejections under this section made in this
 Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-3, 5-6, 8 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Kawasaki (JP 2003137758).

The reference teaches odor masking compositions containing fragrant

Application/Control Number: 10/520,907

Art Unit: 1612

Page 4

substances for hair cosmetics see title. The composition is useful for hair dyes and for permanent wave agents, see abstract. The reference discloses 1-hexanol, 3,5,5-trimethyl-, and 2-Heptanol, 3,4,5,6,6-pentamethyl- see CAS registry no. below.

RN 87118-95-4 HCAPLUS
CN 2-Heptanol, 3,4,5,6,6-pentamethyl- (CA INDEX NAME)
```

4. Claims 1-3, 5-6, 8 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Ahluwalia et al. (WO-2003/063810).

The reference teaches reduction in hair growth, see title. The reference teaches that unwanted mammalian growth of hair can be reduced by topical application of inhibitor of fatty acid metabolism, see abstract and CAS reg. No. The reference teaches surfactant in the composition, see example on page 13.

5. Claims 1-3, 5-6, 8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Birtwistle (EP 371801).

The reference teaches cleaning compositions comprising dialkyl or alkenyl phosphates and alcohol derivatives for skin and hair care see title and abstract.

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claims 1-3 and 5-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Michael et al. (WO-00/00164, presented in IDS).

Michael teaches a leave-on hair composition which contains a diol, abstract. The reference teaches on page 4, various diols that are included in the composition. The

Application/Control Number: 10/520,907

Art Unit: 1612

reference teaches polar solvent in the composition such as water, see page 3, last Paragraph. The reference teaches surfactants and betaine, see examples.

Diol

The compositions of the present invention comprise from about 3% to about 30%, preferably from about 4% to about 25%, more preferably from about 5% to about 20%, and most preferably from about 7% to about 15% of a diol. The diol may be a 1, 2-C₅-C₈-alkane diol, a C₂-C₁₀-alkyl glyceryl-ether, or a mixture thereof.

The 1,2 C₅-C₈-alkane diols are compounds of the formula:

where R^1 is an propyl, butyl, pentyl, or hexyl group. R^1 may be straight chain or branched groups, preferably straight chain. The preferred alkane diols are 1,2 n-pentane diol, 1,2 n-hexane diol, 1,2 n-hexane diol, or mixtures thereof. Most preferred is 1,2 n-hexane diol, where R^1 is n-butyl.

While reference teaches various diols with the claimed formula having butyl instead of tertiary butyl entity in the above formula, the reference does not explicitly teach the claimed 3,3-dimethyl-1,2 butandiol. MPEP states the following with respect to compounds similar in structure:

A *prima facie* case of obviousness may be made when chemical compounds have very close structural similarities and similar utilities. "An obviousness rejection based on similarity in chemical structure and function entails the motivation of one skilled in the art to make a claimed compound, in the expectation that compounds similar in structure will have similar properties." *In re Payne*, 606 F.2d 303, 313, 203 USPQ 245, 254 (CCPA 1979). See *In re Papesch*, 315 F.2d 381, 137 USPQ 43 (CCPA 1963) (discussed in more detail below) and *In re Dillon*, 919 F.2d 688, 16 USPQ2d 1897 (Fed. Cir. 1991) (discussed below and in MPEP § 2144) for an extensive

Art Unit: 1612

review of the case law pertaining to obviousness based on close structural similarity of chemical compounds. See also MPEP § 2144.08, paragraph II.A.4.(c).

As such, in view of <u>in re Payne</u>, it would have been obvious to one of ordinary skill in the art at the time of instant invention to utilize 3,3-dimethyl-1,2 butandiol in the primary reference with an expectation to obtain a composition with hair leave-on hair treatment with a reasonable expectation of success.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Snigdha Maewall whose telephone number is (571)-272-6197. The examiner can normally be reached on Monday to Friday; 8:30 a.m. to 5:00 p.m. EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frederick Krass can be reached on (571) 272-0580. The fax phone number for the organization where this application or proceeding is assigned is 571-273-0580. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO
